

GILBERT-CHANDLER AREA DRAINAGE MASTER STUDY/PLAN (ADMS/P) UPDATE

About the Project

Due to changes in land use and population growth, the Flood Control District of Maricopa County is re-analyzing flood hazards and risks in southeastern Maricopa County within portions of the Town of Gilbert, the cities of Chandler and Mesa, the Gila River Indian Community and unincorporated Maricopa County areas.

Why are we doing this project?

The goals of the Gilbert-Chandler ADMS/P Update are to:

Identify the existing flood hazards and risks based on an updated analysis.

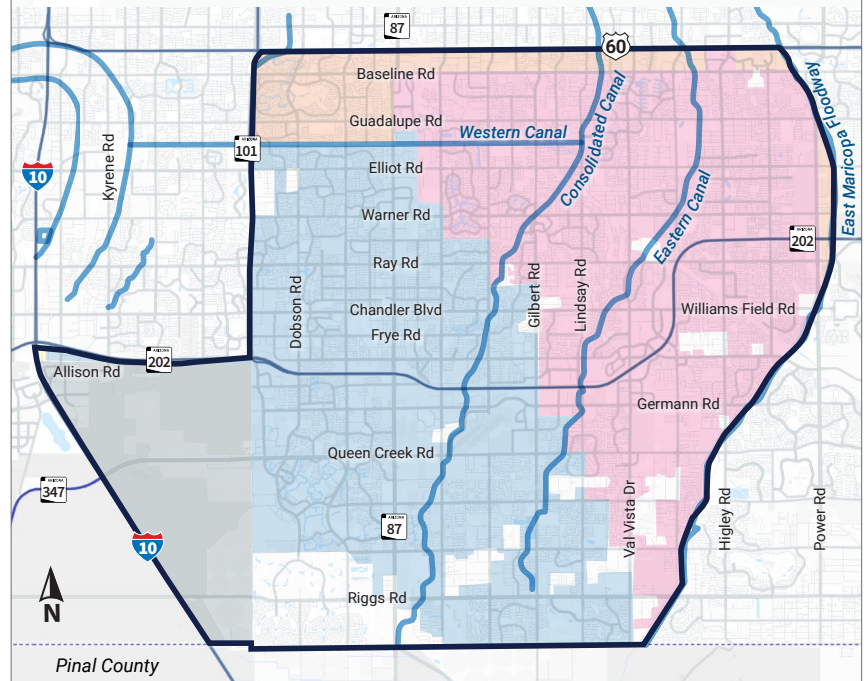

Inform residents and businesses about the types of flood hazards and risks that can occur from moderate to large storms.

Evaluate mitigation solutions and estimated costs to reduce flood risks.

- Chandler
- Gilbert
- Mesa
- Canal/Levee
- Gila River Indian Community
- Unincorporated Area

Project Timeline

April 2024–Spring 2025

Spring 2025–Summer 2026

Summer 2026–Summer 2027

Data Collection

Identify known and potential flood hazards

Flood Hazard Modeling

Model and assess flood hazards

Mitigation & Hazard Identification

Develop solutions to reduce flooding

Stay Engaged With Us!

Give Input – Visit our website to TAKE A SURVEY. Identify where flooding has occurred or areas of concern for flooding.

Get Involved – Sign up for information and updates.

Spread the Word – Share the website and information about the project with family, friends, co-workers and neighbors!
